Welcome Letter for CIPPE 2014:

It is my pleasure to welcome you to the USA Pavilion at China International Petroleum & Petrochemical Equipment and Technology Exhibition 2014.

CIPPE is the most important annual petroleum and petrochemical expo held in China. It showcases the world's latest technology, equipment and management solutions and offers U.S. companies an excellent opportunity to present their technologies, products and expertise to Chinese clients. It also serves as an important platform for cooperation between U.S. and Chinese companies.

We are excited about the number of U.S. companies participating in the USA Pavilion. With superb technologies and top-line services, the U.S. petroleum and petrochemical industry has long been a reliable partner in China's economic development. We believe that CIPPE 2014 will enhance the already favorable trade relationship between China and the United States.

The U.S. Commercial Service in China is ready to provide support and assistance to Chinese companies looking for U.S. products and services as well as U.S. exporters exploring business opportunities in China. For additional information, please visit our booth at CIPPE 2014 or visit our homepage at www.export.gov/china.

I wish CIPPE 2014 every success.

Sincerely,

William Zarit
Minister for Commercial Affairs
Embassy of the United States of America

欢迎致辞：

欢迎您光临2014中国石油石化与化工技术装备展美国展团！

一年一度在中国举办的中国石油石化与化工技术装备展是石油化工行业的一次盛会。它向世人展示着世界石油化工行业的最新技术设备和管理经验。中国石油石化与化工技术装备展给美国公司提供一个向中国客户展示他们的技术、产品和经验的最好机会。同时，它也为美中企业之间的合作提供了一个平台。

我们很高兴的看到有许多美国公司参加了美国国家展团。长期以来，拥有尖端技术和一流服务的美国石油化工企业一直是中国经济发展过程中值得信赖的合作伙伴。我们相信，中国石油石化与化工技术装备展将进一步推动美中贸易关系的发展。

美国使馆商务处随时准备帮助中国企业寻找美国的产品和服务，帮助美国出口商在中国寻求商业机会。如果您有任何需要帮助的地方，请到美国使馆商务处的展位（展位号W1665）作相关咨询，我们在现场的商务专员将会乐于为您提供诚挚和必要的服务。如需要了解更多信息，欢迎访问的网页：www.export.gov/china。

祝本次展会圆满成功！

诚挚的，

蔡瑞德
商务公使

American Petroleum Institute is an authorized organization serving for the worldwide oil and natural gas industry. API plays an important role through publishing the industry technical standards and publications which help engineers in the design, operation, and maintenance of efficient and reliable quality management systems and keep abreast of technological advances in the oil and natural gas industry. The equipment manufacturers and service providers based on API standards are recognized in the industry through applying for API certificate. At the same time, API provides various professional trainings through API Certified Training Providers (TPCP). API organizes global industry events regularly for the great improvement of oil and gas industry at professionalism, competence, quality, safety, environmental protection and energy saving. Please visit API website (www.api.org) for the detailed information: API Standards: www.api.org/Standards API Certifications: www.api.org/certifications API Meetings: www.api.org/meetings/calendar API Publications: www.api.org/Publications.

CBG Corporation

地址 Add: CBG Corp.4616 West Howard Lane, Suite 900,Austin, TX 78728,U.S.A.

电话 Tel: 001-512-491-7541

传真 Fax: 001-512-491-7561

网址Web: <http://www.cbgcorp.com>

CBG公司成立于1992年，创始人为具有丰富先进测井仪器设计及生产经验的一些工程技术人员。CBG公司是美国注册的S类公司，拥有两名合作人及22名员工。

公司的创始人自从1984年起，就一起在吉尔哈特公司的奥斯丁研究中心工作。在公司成立的头12年里，CBG公司为大石油服务公司，提供外包的先进仪器的开发工作，其中包括LWD的波传递电阻率仪，阵列感应仪，以及井眼成像仪等。我们还开发了专门的套管井仪器系列，包括地层密封，井下无线电识别（RFID）阅读设备，砂砾岩密度，自然伽马，以及含气率仪器等。

自从1998年起，CBG公司还设计及生产了多种定向钻井仪器：MWD/LWD，生产测井，套管检验，及环境监测等仪器，获得了美国的7项专利以及国际上的10项相关的专利，还有更多的专利正在申请过程中。新产品都是按照我们的发明以及我们专有的知识产权而设计的。

CBG公司已经成为了定向钻井伽马仪器的最大独立供应商，总销售量已超过3500多支仪器。CBG的伽马仪器已在美国，加拿大，中国，澳大利亚，欧洲，及印度使用。我们不断地对我们的产品进行改善和技术指标的升级来面对钻井技术所带来的新挑战。

CBG公司自成立起，非常注重提供客户的技术支持及产品的保修。我们的有些产品在使用15年之后还退给我们作维修！我们的这些承诺让我们在这行业界获得了很高的荣誉。

Centrisys公司之所以发展成为世界上最具声望的离心机制造商,其原因在于:我公
司是真真切切的从基础服务的根基上成长起来的。到目前为止, Centrisys公司已有
超过1000台的离心机在世界各地运行。我们设计的两相和三相离心机可在最低功率
时产生最大的扭矩。我们的客户享受Centrisys离心机带来的低运行和维护成本,因
为Centrisys离心机固料处理量更大,处理流量更高。

The reason Centrisys has grown into one of the world's most respected centrifuge manufacturers is, we literally built our company up from feet on the ground service. Today Centrisys has over 1,000 centrifuges operating around the world. Our lines of 2-phase and 3-phase centrifuges are designed to deliver the highest torque at the lowest HP. Our customers enjoy lower operating and maintenance costs because Centrisys centrifuges deliver increased solids handling and higher flow rates.

Click Bond designs and manufactures fasteners optimized for adhesive attachment to structure including rivetless nutplates, studs, standoffs, brackets, cable tie mounts; sleeves for hole repair/protection, and composite threaded fasteners. Click Bond adhesive bonded fasteners incorporate a unique fixture that promotes accurate positioning and maintains consistent clamp-up of the bondline during the adhesive cure, insuring a strong bond. Click Bond surface mounted hardware are used in a wide variety of applications such as, simplifying the installation of supports for electrical, fuel, and hydraulic systems, or when providing a strong attachment to a structure when drilling into structure is objectionable or when there is a desire to reduce labor requirements by up to 80 percent. Click Bond hardware is designed to meet or exceed industry and customer performance standards and to be compatible with a variety of surfaces and survive harsh environmental conditions. Click Bond adhesive bonded fasteners are available in aluminum, stainless steel, titanium, glass/epoxy, carbon/epoxy and thermoplastic baseplate materials. We take pride in our ability to assist manufacturers and maintainers in using bonded fastener technology to improve the structural characteristics, extend product life, reduce labor expense, and streamline the manufacturing processes.

Airflex® founding in 1938, is one of the most recognized names in the industrial clutch and brake market. Airflex products are currently applied in a variety of industries, including: oilfield, mining, grinding mills, marine, paper, metalworking, can making, logging, converting and dynamometer. We also offer design and engineering assistance to help our customers get the right parts at the first time and test our specially engineered products in a state-of-the-art testing lab. Eaton Airflex business unit is headquartered in Cleveland, OH with a global manufacturing footprint. Our clutches & brakes are manufactured and assembled at our facilities in Ohio, Mexico and China. Eaton Industrial Clutches and Brakes (Shanghai) Co. Ltd is located within the WaiGaoQiao Free Trade Zone of Shanghai and was established in 2005 as an extension of Airflex operation to China. EICB is assembling & manufacturing WCB water-cooled brakes, VC clutches and DBBS brakes in the China facility. Being a wholly owned foreign entity, EICB has strictly implemented the same high quality standard of EBS and ELS as other Eaton facilities in the world. We provide super quality products and excellent field service globally.

GP:50 is a leading manufacturer of pressure transducers / transmitters, was founded in 1986 by Donald J. Less. GP:50 provides products for the upstream oil & gas market for well servicing companies, fracking, cementing, acidizing, nitrogen pumping, coil tubing, well head pressure control, BOP systems, rig safety systems, hydraulic top drive control, tong torque measurement, as well as Subsea gage and differential pressure and temperature transmitters. We utilize Strain gage sensor technology for all transmitters from 0-30 PSI through 0-100,000 PSI and silicon sensor technology down to 0-0.5" WC in gauge, absolute, vacuum or Differential pressure formats. Our WECO® "HAMMER" Union pressure / temperature transmitters are with all Hazardous approvals. All Strain gage sensors are machined from solid Stainless steel, typically 17-4 PH, various grades of Inconel; X750, X718 & Hastelloy. Material and API certs are available, our products meet NACE MRO175 guidelines for corrosion resistance and depending on the media we can offer other exotic material when requested. Tect Electronics is a Hong Kong electronic components' distributor specialized in high quality RF microwave devices since 1999. We have an array of sales offices in Shanghai, Beijing, Chengdu and Shenzhen. We are proud of our state-of-the-art products from US and Europe. Our product line consists of a wide variety of RF microwave components. Whether you are looking to measure cement pressure on a pumping track, the fuel pressure on a rocket, the intake pressure on an engine or the water level in a tank, GP:50 has been providing reliable, accurate pressure, level and temperature transmitters for over 22 years. It is very famous in the market & is the leader in this business sector; so, GP:50 is your only choice when you need this kind of product. Tect is the authorized distributor of GP:50 in China. We are well equipped with a highly dedicated professional sales engineering team, who are total solution based. With the keenest support strongly rendered by our reputable principals, as well as best dedicated fast response, excellent technical support and sales service at the most reasonable pricing, we are missioned to maximize our valued customers' satisfaction!

Hunting Titan is a leading provider of downhole tools and equipment to the oil and gas industry. The company designs, manufactures, and distributes perforating gun systems, shaped charges, well-logging instrumentation, perforating gun switches, and other highly engineered hardware used throughout the drilling, completion, and maintenance of a well. Titan Specialties was founded in 1966 in Pampa, Texas as a premier perforating gun and hardware manufacturer and has expanded vertically, horizontally, and geographically to offer more than 43,000 products throughout North America and globally. Hunting Titan's products are critical to the development and performance of oil and gas wells, as perforation provides the physical conduit through which hydrocarbons flow into the wellbore. As a result, quality and reliability are critical during the final completion stage of a well. Hunting Titan is recognized as an industry leader with a long-standing reputation for the performance of its products.

Milton Roy Company is a global leader in the design, manufacture and sales of metering pumps and speciality pumps. It is a preferred supplier of metering pumps and dosing systems to the chemical processing, hydrocarbon processing, oil/gas, water treatment, paper, power and other industries all over the world. In the last 70 years, Milton Roy built up its' famous brand and best reputation relies on excellent products of high quality, as well as its' reliable technical support and customer service all along. Now, Milton Roy has three centers based in United States, France and Shanghai China, which focus on research, manufacture and service, all together to build up its' strengths to satisfy worldwide customers.

Otis Instruments是一家专门设计和生产特定气体探测系统的公司,产品可分有线和无线两大类,被测气体包括环境空气中的有毒、腐蚀性、易爆、或维持生命的气体。成立于1983年,Otis Instruments公司开发的固态硫化氢(H₂S)传感器,对80年代初石油和天然气行业气体探测和提高安全性作出了革命性的贡献。今天,Otis Instruments提供的固态H₂S传感器既可以作为一个完整的传感器组件的一部分,也可以换作其他类型的传感器,比如催化珠、红外、光电离和电化学,用于探测其他气体。可根据各种不同的应用环境从沙漠高温到冰原进行定制,这些产品使Otis Instruments在气体探测仪器领域成为世界权威。虽然有线气体探测系统已被证明可靠耐用,但是安装昂贵且耗时。2005年,Otis Instruments率先探索了无线(WireFree™)的气体探测产品,我们从而继续改进和生产具有成本效益的,经过时间考验和行业认可的WireFree™系统产品。Otis Instruments的WireFree™系统同时拥有ATEX和CSA的认证。我们的WireFree™技术使用远距离、独立完备和电池供电的传感器组件进行无线通信,向接收器传送气体水平读数。我们的接收器具有数据记录、以太网输出的能力、并可以进行多个无线电通讯。根据国际频率标准,所有WireFree™的产品提供900MHz或2.4GHz无线电。在Otis Instruments,我们为自己的产品质量、有竞争力的价格和短的交货时间感到自豪。客户服务第一,我们完善的质量控制体系包括:自主生产制造、经过认证的技术支持团队、现场服务技术人员、所有产品的使用和维护技术培训认可、在线产品培训和由经过Otis Instruments公司认证的代表进行系统安装。Otis Instruments公司提供一个完整的系统,包括继电器、报警器(灯和/或声)、定制外壳以及客户指定的标志和商标。我们广泛的产品系列和独特的功能可以满足在任何市场几乎任何应用。从石油钻井平台到停车场,从废水处理厂到邮轮 - 只要有气体探测的需要,Otis Instruments就有一个系统来满足。关于我们公司和产品的更多信息,请访问: www.otisinstruments.com。

Otis Instruments is a manufacturer of wired and wireless systems designed to detect toxic, caustic, explosive, or life-sustaining gases in ambient air. Established in 1983, Otis Instruments developed a solid state hydrogen sulfide (H₂S) sensor that revolutionized gas detection and improved safety in the Oil and Gas industry during the early 80s. Today, Otis Instruments offers its solid-state H₂S sensor as part of a complete sensor assembly. Other sensor types, including catalytic bead, infrared, photoionization, and electrochemical, can be used for detecting other gases. Customizable for a variety of applications—and sustainable in temperatures ranging from desert heat to ice fields—these products make Otis Instruments the world's foremost authority in gas detection. Although hard-wired gas detection systems have proven to be durable and reliable, installation can be costly and time-consuming. In 2005 Otis Instruments pioneered wireless (WireFree™) gas detection products, and we continue to manufacture WireFree™ systems that are cost-efficient, time-tested, and industry-approved. Otis Instruments WireFree™ systems hold both ATEX and CSA certifications for explosion-proof applications. Our WireFree™ technology uses long-range, self-contained, battery-powered sensor assemblies to wirelessly communicate gas-level readings to a receiver. Our receivers feature data-logging, Ethernet output, and the capacity to host multiple radios. To comply with international frequency standards, all WireFree™ products are available with 900MHz or 2.4GHz radios. At Otis Instruments, we pride ourselves on quality control, competitive prices, and short lead times. We make customer service a priority, and we maintain quality control with in-house manufacturing, a certified technical support team, field service technicians, technical training certification program for use and maintenance on all of our products, online product training, and system installation by Otis-certified representatives. Otis Instruments provides a complete system that can include relays, alarms (lights and/or horns), customized enclosures, and customer-specific labels with a client's own logo. Our broad product line and distinct features can accommodate nearly any application, in any market. From oil rigs to parking garages, waste water plants to cruise ships – wherever gas detection is required, Otis Instruments has a system to meet the need. For additional information regarding our company and products, please visit: www.otisinstruments.com.

Spencer® applies 120 years of industry technology leadership to engineer, design and manufacture equipment solutions for extreme air and gas handling challenges. Our custom blowers and gas boosters are unique and specialized for their target application. Spencer is recognized worldwide for designing and manufacturing custom gas boosters and centrifugal blowers for handling corrosive and toxic gases such as sulfides, halogens, acids, flue gases, cyanides, nitrogen and ammonia. Equipment may be fabricated from special metals including stainless steel, aluminum, Hastelloy®, Monel®, Inconel® or aluminum; and special coatings maybe applied to internal and external components that offer corrosion and abrasion resistance, spark-resistant operation, non-stick performance, and high or low temperature resistance. Restrictive shaft sealing and leak-tight designs are available to handle temperatures to 1100°F/595°C; casing pressure to 1000psig/6895kPa; inlet pressure to 500psig/3447kPa; differential pressure to 20psig/138kPa, volumes to 15000icfm/25485m3/hr. In addition to fabricated blowers and gas boosters, Spencer also designs and manufactures multistage cast centrifugal blowers, regenerative (side channel) blowers, central vacuum systems, mobile vacuum units, dry and wet separators, tubing and fittings, vacuum cleaning hoses, tools and accessories, and electrical control panels.
